NSE DATA

PORTFOLIO

PRODUCT PRESENTATION · 2026

Financial data is everywhere. Clarity is not.

Most people manage money across disconnected messages, statements, apps, and market sources.

01 Fragmented records

Income, expenses, telebirr, bank accounts, goals and investments live in separate places.

02 Low financial visibility

Users struggle to understand cash flow, category pressure, savings progress and debt burden.

03 Generic guidance

Advice is often disconnected from the user's actual numbers—or generated without deterministic calculations.

04 Investment opacity

Retail investors need a simple view of holdings, allocation, returns and clearly labelled asset values.

The opportunity: turn raw financial activity into one explainable, actionable view.

One financial command center

Vizier combines deterministic finance engines, persistent personal data and an optional AI explanation layer.

01

PLAN

Income, expenses, category limits, savings goals and debt tracking

02

UNDERSTAND

Cash-flow metrics, health scoring, trends, alerts and monthly comparisons

03

INVEST

Persistent holdings, returns, dividends, allocation and concentration

04

ASK

Context-aware AI coaching with an offline rules-based fallback

DETERMINISTIC MATH · AI EXPLANATION · USER ACTION

A complete personal-finance workflow

ACCOUNTS & DATA

- Registration + sign-in
- SQLite persistence
- Multiple accounts
- CSV export + deletion

BUDGETING

- Custom categories
- Budget alerts
- Savings goals
- Debt + emergency fund

INTELLIGENCE

- Health score
- Monthly trends
- Statement categorization
- Duplicate detection

INVESTMENTS

- Multiple holdings
- Dividends + total return
- Allocation + sectors
- Watchlist

AI WORKSPACE

- Spending summaries
- Context-aware Q&A
- Transaction explainer
- Scam screening

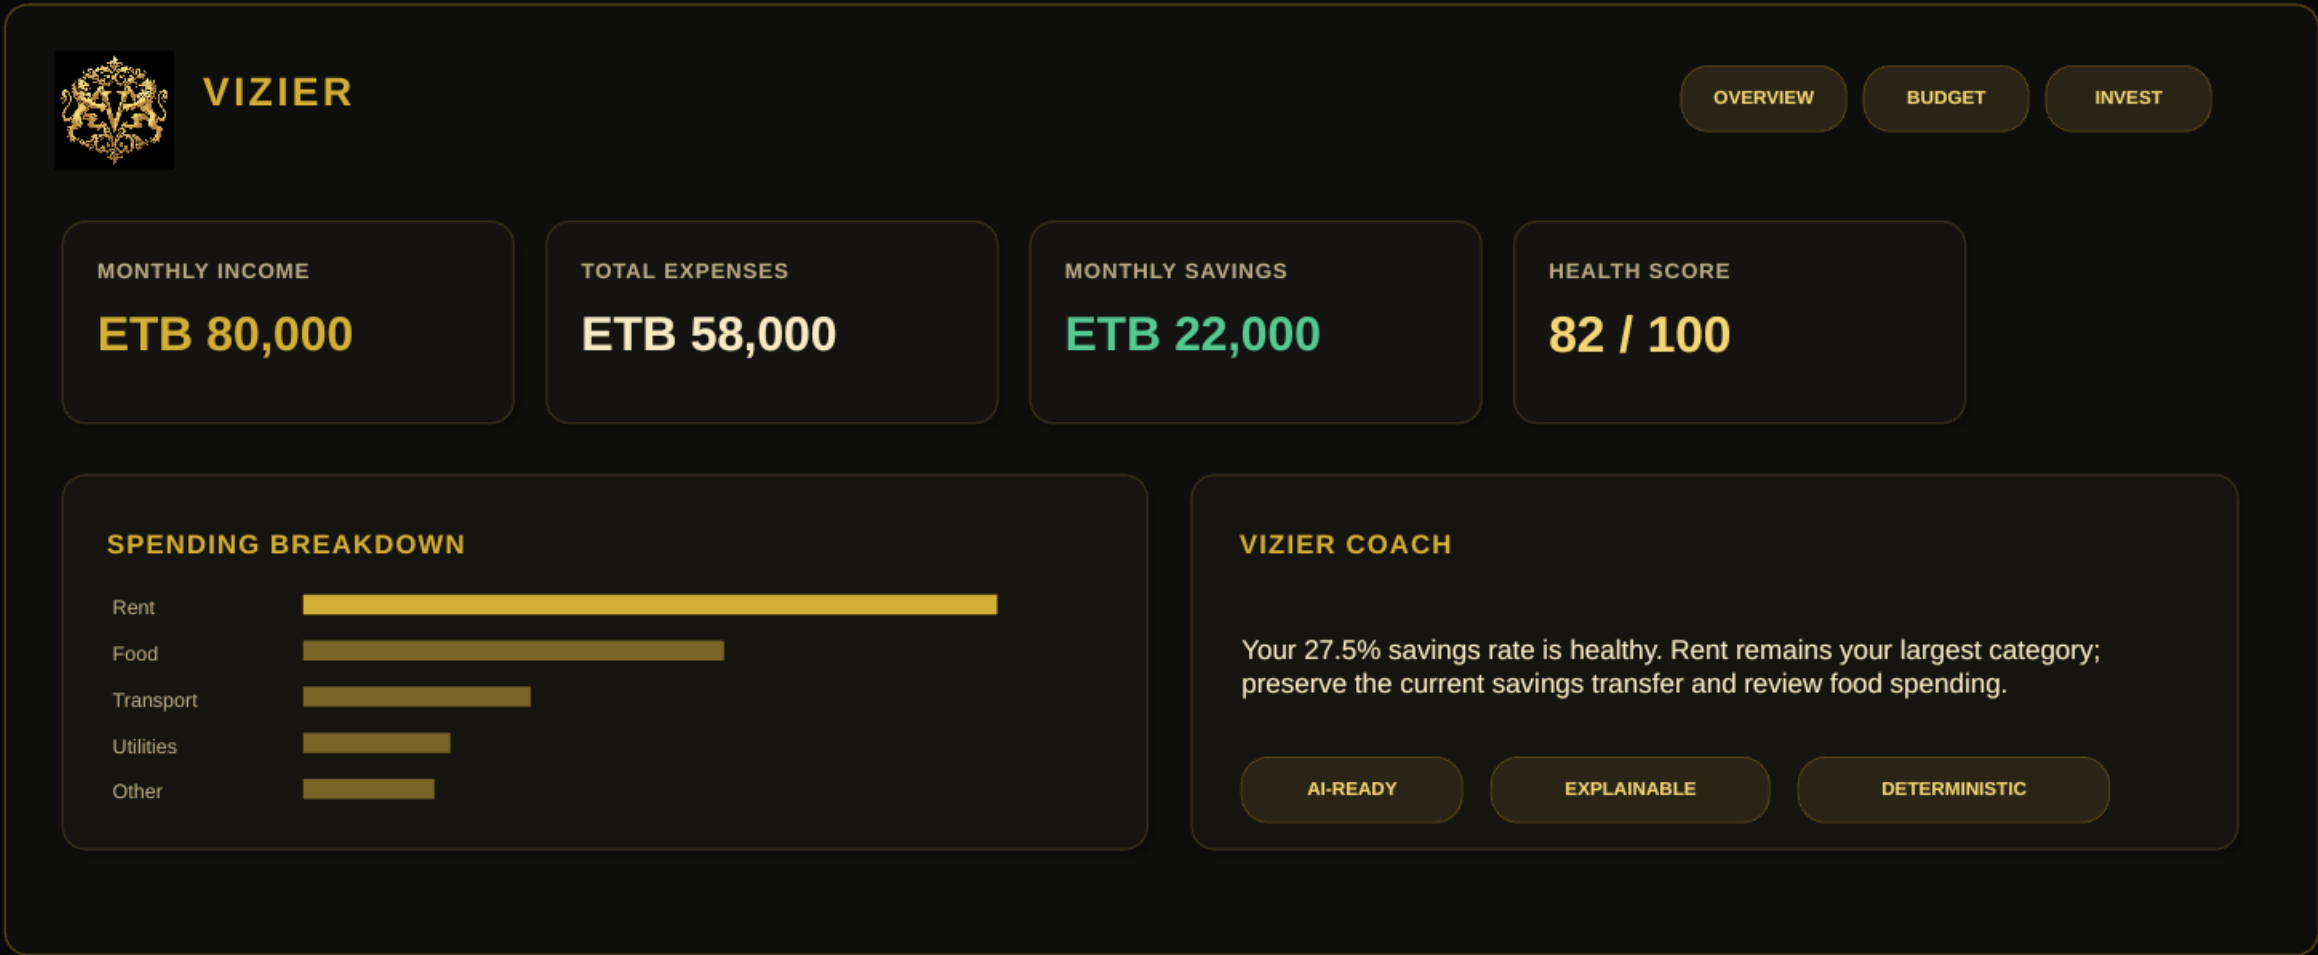

MARKET DATA

- Asset reference values
- Price + change
- Feed metadata
- Cache + demo fallback

31 automated tests validate calculations, persistence, imports, market fallbacks and AI rules.

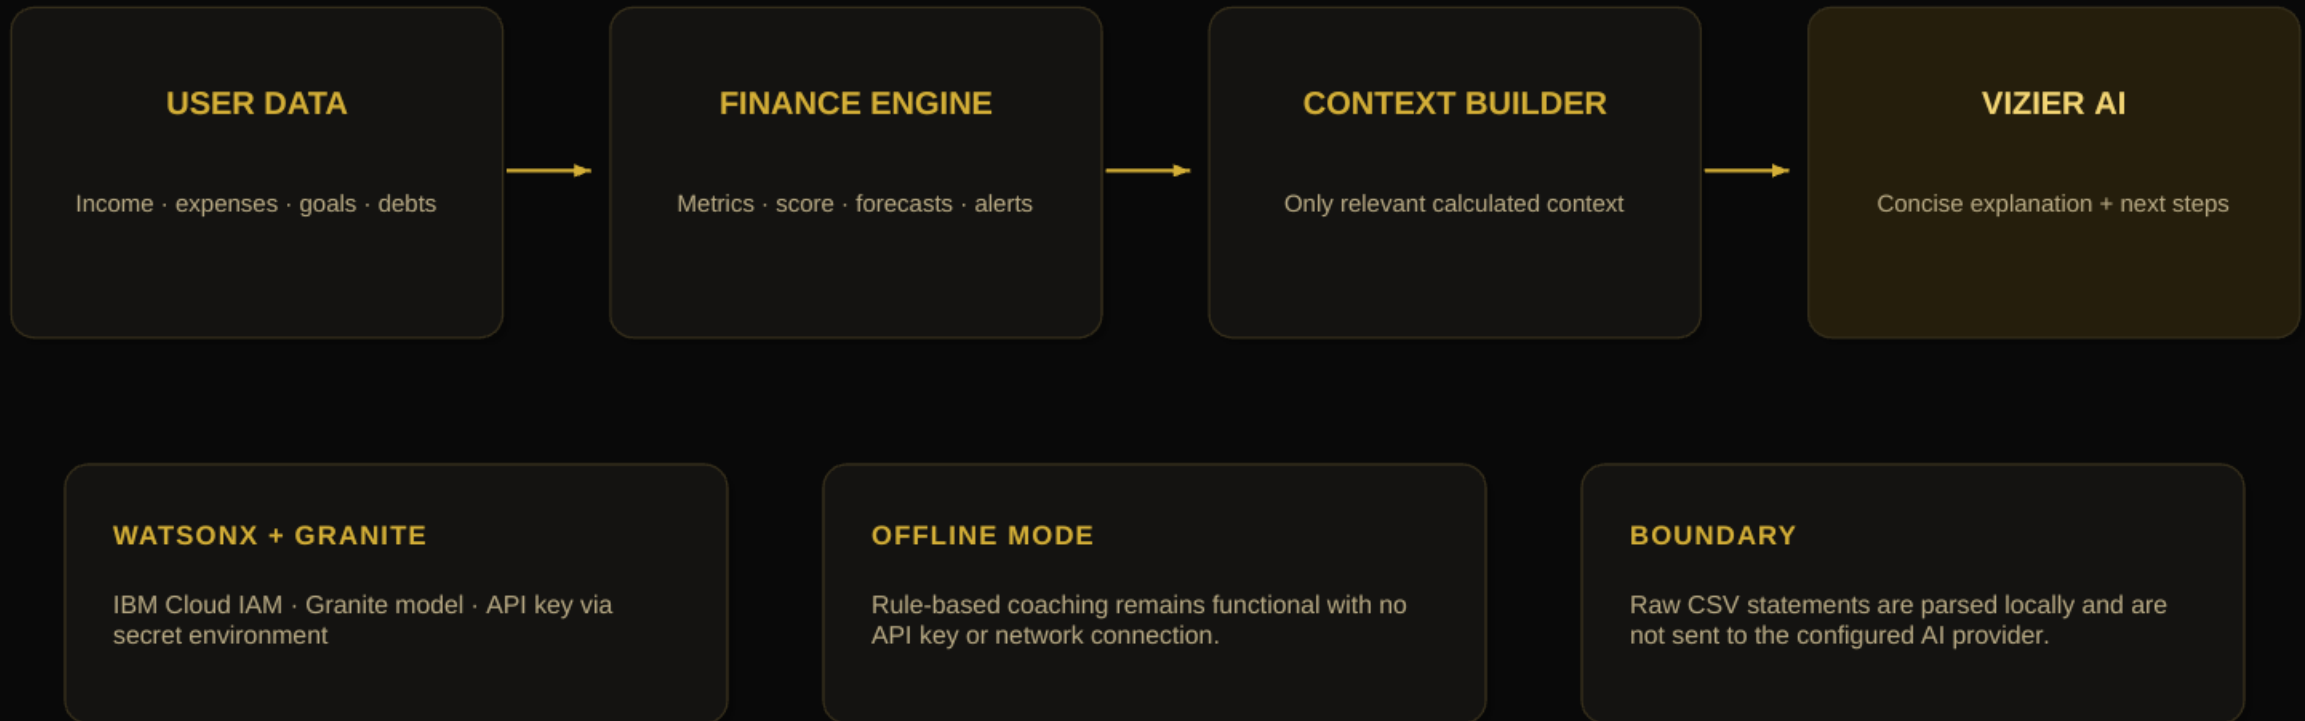

A dashboard designed for decisions

Black-and-gold visual system with persistent light and dark modes.

The model explains. Python calculates.

A deliberate separation keeps financial numbers reproducible and inspectable.

From statement rows to an explainable health score

HEALTH SCORE · 0-100

OUTPUT

82

/ 100 STRONG

- Maintain the current savings rate
- Grow emergency cover toward three months
- Review categories approaching 80% of budget

A clearer view of the portfolio

Persistent holdings, Ethiopian asset references and portfolio-level analytics.

PORTFOLIO VALUE

ETB 324,500

TOTAL RETURN

+18.4%

DIVIDENDS

ETB 12,300

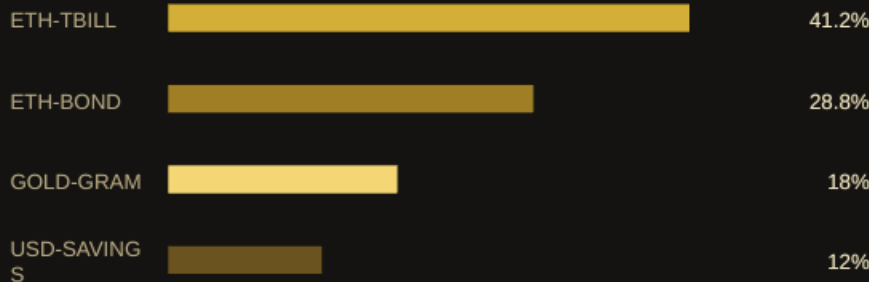

LARGEST POSITION

41.2%

HOLDINGS

Asset	Shares	Public price	Value	Return
ETH-TBILL	100	ETB 37.20	ETB 3,720	+86.0%
ETH-BOND	500	ETB 93.75	ETB 46,875	+25.0%
GOLD-GRAM	300	ETB 93.50	ETB 28,050	+19.9%
USD-SAVINGS	80	ETB 280.00	ETB 22,400	+33.3%

ALLOCATION

Illustrative references · optional configured feed · 5-minute cache · labelled fallback

Simple enough to move fast. Structured enough to grow.

EXPERIENCE

NiceGUI · responsive dashboard · light/dark themes

APPLICATION

Finance · budgeting · health · AI · imports · investments

DATA

SQLite · user-scoped records · transactions · holdings · goals

EXTERNAL

IBM watsonx.ai + Granite · optional configured quote feed

PYTHON · NICEGUI · SQLITE · IBM WATSONX.AI · GRANITE

Privacy-conscious by design

Current safeguards are suitable for a strong prototype; production hardening is the next major phase.

LOCAL FIRST

Statements are parsed locally; raw files are not sent to AI.

PASSWORDS

Salted PBKDF2 hashes; plain-text passwords are never stored.

USER SCOPE

Accounts, goals, debts, holdings and transactions are user-linked.

CONTROL

CSV export and cascading account deletion are built in.

PRODUCTION CHECKLIST

- ☐ HTTPS and secure deployment
- ☐ Strong rotated session secrets
- ☐ Shared rate limits and abuse monitoring
- ☐ Database encryption and backups
- ☐ Password reset + email verification
- ☐ Audit logs and security monitoring

From working prototype to trusted financial product

NOW

Working MVP

ETB budgeting · statements ·
portfolio · watsonx.ai + Granite

NEXT

Production foundation

Managed identity · PostgreSQL ·
audit logs · backups

THEN

Data automation

telebirr parsing · bank connections ·
recurring expenses · notifications

LATER

Market intelligence

Fundamentals · announcements ·
rates · research · broader assets

SEE VIZIER IN ACTION

A five-minute demo

1

CREATE

Register and choose a financial account

2

PLAN

Enter income, expenses, budgets and goals

3

IMPORT

Map and categorize a CSV statement

4

UNDERSTAND

Review trends, alerts and health score

5

INVEST

Add assets and review labelled reference values

6

ASK

Question Vizier's context-aware AI coach

VIZIER

YOUR MONEY, MADE CLEARER.
